WORK EXPERIENCE

FOREX TRADING TUTOR, SELF-EMPLOYED

August 2020 - November 2020

- Significantly boosted global audience engagement and retention by orchestrating and delivering immersive forex trading courses via virtual platforms. Facilitated mastery of trading strategies, resulting in enhanced participant satisfaction and retention rates.
 - Established effective communication channels to offer continuous support and guidance to remote participants, promptly addressing inquiries, clarifying complex concepts, and fostering an inclusive online learning community
 - Anticipated and resolved challenges inherent in remote learning environments. Implemented innovative teaching methodologies to enhance the virtual learning experience
 - Ensured a seamless and impactful educational journey for participants across different time zones.
-

PROJECTS

Pocket Plan – Personal Finance & Expense Tracker | [LINK](#)

January 2025

- **Description:** Developed a personal finance tracking application to help users manage expenses, track income, and analyze spending habits.
- **Technologies:** Built with React, JavaScript, and Vite for a fast and responsive interface, Firebase for authentication and data storage, and Ant Design for UI components.
- **Key Features:** Implemented real-time expense tracking, data visualization with charts, Google authentication, and CSV file import for financial records.
- **Contributions:** Designed and developed the user interface, integrated Firebase authentication, and optimized performance for seamless financial management.

Coin Track – A Cryptocurrency Tracker | [LINK](#)

December 2024

- **Description:** Developed a cryptocurrency tracking application for users to monitor real-time price changes, trends, and market data.
- **Technologies:** React, JavaScript, Vite, Material-UI, Chart.js, Axios, React Toastify, React Router, Framer Motion and CoinGecko API integration.
- **Key Features:**
 - Real-time cryptocurrency data and trends.
 - Interactive charts for detailed market analysis.
 - Advanced filtering and search options for cryptocurrencies.
 - Secure web-sharing capabilities with React Web Share.
 - Toast notifications for user interactions.
 - Responsive and accessible design across devices.
- **Contributions:** Designed and developed the front-end interface, implemented API integration, and optimized performance for a smooth user experience across devices.

Tick Pro – Luxury Wristwatch Shopping Site | [LINK](#)

April 2024

- **Description:** Developed an e-commerce website for customers to shop and check out luxury wristwatches.
- **Technologies:** Built with React, JavaScript, and Vite to ensure a fast and efficient user experience, Firebase for data storage dynamic data fetching.
- **Key Features:** Implemented secure checkout, product listings, and a user-friendly shopping cart.
- **Contributions:** Designed the user interface, ensured responsive design, and optimized performance for a seamless shopping experience.

Echo news – A news aggregator site | [LINK](#)

July 2024

- **Description:** Built a news aggregation platform to display curated articles from multiple sources in one place.
 - **Technologies:** Developed using React, JavaScript and Vite; integrated with NewsData API for fetching and displaying news data.
 - **Key Features:** Implemented real-time news updates, category filtering, and a user-friendly layout for browsing articles.
 - **Contributions:** Designed and developed the front-end interface, integrated external APIs, and ensured a seamless user experience with optimized performance.
-
